Introduction

I code, develop and blog around Computer Science. I want to get experience on real-world software projects, that's why I'm applying for **Developer Internship** roles

Projects

PyJob

github.com/PyJob

- Developed a program where user can get job titles from the web and output into excel file
- Programed automatic class to clean and label data for SQL Server
- Implemented data insertion into Relation database on local server
- Techstack: Python, Selenium

Innovation Project

github.com/Innovation-Project

- Led a team to develop a blockchain-based website with a robust backend
- Research: Drew design diagrams, read and gathered documents
- Planning: Designed UI/UX, User Story
- Frontend: Customized React Theme
- Backend: Designed API
- Techstack: React, Node.js, Solidity, SQL

Technologies

Languages: C++, Python, SQL

Technologies: .NET, PostgreSQL, Git

Cloud: AWS

Courses

How to Design Program

github.com/How-to-Design-Program

Learning how to design code for readability and maintainability.

Blog

Medium Author

medium.com/DangChi

Write articles on topics: Computer Science, Software Development, Math, Life

Education

Swinburne University of Technology, BS in Computer Science

2022 – May 2026

- **Coursework:** Data Structure (C++), Cloud Computing (AWS), Object Oriented Programming (C#), Software Testing
- **English:** IELTS 7.5, **Vietnamese:** Native
